Experience

Founder — SkywalkLab — skywalklab.com — SvelteKitTypeScriptViteAI Integration

'25 - Now

- Founded a web agency offering custom web apps, AI-powered workflow automations, e-commerce, and multilingual sites.
- Architected 61+ component library with custom Vite plugins (SEO, icons, vendor) and multi-stage Docker builds.

Full Stack Developer (FSD) — Inkwell — SvelteKitTypeScriptSASSMCP

'23 - Now

- Reduced content creation time by 90% by building a TypeScript automation pipeline with local open-source AI that queries YouTube API, retrieves transcripts, generates scripts, creates videos via Pictory API, and auto-posts to 3 platforms.
- Enabled AI-powered user support across 2 LLM providers by developing a custom MCP server.
- Built a shared component library used across 3 Inkwell products (Inkwell, Press, Publishers), ensuring brand consistency and reducing development time.
- Streamlined subscription management by building admin dashboards with Stripe integration for payment processing and analytics.
- Improved onboarding and retention by producing demo videos with Premiere Pro, reducing learning curve and increasing stickiness.

FSD / Dir. of Operations — Success Portraits Test — Next.jsTypeScriptPostgreSQLDockerGKERedis

'23 - Now

- Built full-stack personality test platform analyzing 19 traits with Next.js, TypeScript, and PostgreSQL.
- Reduced page load times by 60% by implementing Redis caching and optimizing database queries across the application.
- Expanded product offerings by 400% (from 2 to 10 PDF reports) by building automated PDF generation and mapping personality traits to ONET work styles.
- Enabled AI-powered career analysis by developing a custom MCP server integrating test results with LLMs for personalized feedback.
- Improved recommendation accuracy by implementing Euclidean distance algorithms to match user personality profiles with career paths.

FSD / Dir. of Operations — Success Portraits WordPress — PHPRedisMySQLNginxGCE

'23 - Now

- Enabled group testing for enterprise clients by building a custom WordPress plugin with "master keys" system supporting individual and bulk test key management.
- Achieved 99.9% uptime by configuring Google Compute Engine VMs with Nginx, Redis caching, and MySQL optimization.
- Led a cross-functional team of 3 (marketing director, blog writer) and coordinated with academic partners and clients to drive product development and strategic decisions.

Full Stack Developer (FSD) — Academic Influence — NunjucksSASSPostgreSQLWebpackExpress

'19 - '23

- Built interactive data visualizations and comparison tools for 10,000+ institutions using Nunjucks, SASS, and TypeScript.
- Enabled data-driven college decisions by integrating BLS and NCES APIs with ROI calculations in a degree finder tool.
- Reduced hero image creation time by 95% by developing a dynamic SVG-based generator for thousands of pages.

Education

Advanced Masters in Digital Strategy Management — Grenoble Ecole de Management

'20 - '21

- 2021 Best Dissertation Winner

B.S. in Marketing — University of Georgia

'08 - '12
